- 3 The full census tract number consists of six digits with an implied decimal point between the fourth and fifth digits. For legibility on this map, the leading zeros have been stripped and the decimal point is shown. To translate a census tract number on the map to its full code, add as many zeros as needed to the left side of the number to reach six total digits and remove the decimal point before the last two digits.
Example: Census tract number on the map "33.07" represents census tract code "003307"
